

The partner for smart solutions you can trust

Hager is a full-range supplier of electrical installation systems for building, residential and commercial properties. For decades, Hager has been synonymous with an extensive and complete offering. Highest quality, cutting-edge products, modularity, ease of installation, ease of use, excellent service and sophisticated design are the features that distinguish Hager.

Hager: a brand meeting your expectations

As a specialist in

- power distribution,
- cable management and room connection systems,
- switch programmes and smart building automation as well as safety technology such as alarm systems, smoke detectors and motion detectors.

Hager the supplier for professionals – is a synonym for top quality and innovative technology, as well as good customer relations and reliability. All of which make Hager the partner for smart solutions, you can trust.

New ideas for the customers' benefit

Innovations and the systematic enhancement of the products and systems are key features of the Hager brand. It has always been our goal to use new designs and improvements to stay ahead of developments.

The use of innovations and new technologies at Hager is always customer-driven. Every year, Hager evaluates thousands of customer contacts, result-ing in detailed knowledge of its customers' needs in order to work efficiently and successfully. Based on this knowledge, Hager develops the innovative solutions that are so characteristic for the Hager brand. Ease of installation, ease of use, intuitive user interfaces, modularity and durability are brand values that guarantee highest quality throughout in Hager systems.

80 per cent of Hager products and systems are younger than five years. This high degree of innovation enables the users to meet various new challenges effectively. The strong demand for innovations and enhancements is a good indicator for the customer-oriented policy of the Hager brand also resulting in a high turnover at wholesalers.

A flourishing group

Hager belongs to the Hager Group, which is a family owned business with a more than fifty-year tradition. As a global player, the company has about 11,400 employees and a turnover of more than 1.6 billion Euro in 2013. Today, the Hager Group offers more than 74.000 items.

Humane. Environmentally friendly. Efficient.

Sustainability at the Hager Group: E3

"Quidquid agis respice finem" – Whatever you do, think about the consequences! This motto which is attributable to the Greek poet Äsop (in 600 BC), applies today more than ever. As a result of technical progress, increasing globalisation and decreasing natural resources, the consequences of our actions are becoming increasingly serious – and the demands for more corporate responsibility are becoming increasingly louder. Even if the Hager Group is just a small wheel in this big machine, we want to play our part so we can leave a clean legacy for future generations. We have summarized this understanding of sustainability in a concise term: E3.

E3 is a comprehensive approach of the Hager Group for utilizing the limited resources of our planet sparingly. The three "E"s stand for the three columns of our sustainability: Ethics, Environment and Energy. In German: Ethik, Umwelt und Energie. Each E conceals a specific catalogue of measures that the Hager Group has expressly committed itself to.

Everyone is talking about sustainability. As a family business we want to live it actively – with E3!

"We act ethically and responsibly by caring for our fellow human beings and our environment."

Daniel Hager

ethics

People are the most important natural resource for us. For this reason we are doing everything to support our 11,000 and more "energy sources" worldwide and to mobilize new "forces" for the Hager Group. We are certified "Investors in People"- and rely on structured processes that ensure fair dealings with each other. In addition, we have committed ourselves to compliance with the United Nations Global Compact. It is entered on a voluntary basis between businesses and the UNO for the purpose of shaping globalization in a more social and environmental way. And not least, we care for the wellbeing of every single employee in the Hager Group through locally targeted Care Management.

environment

We are also extending this Care Management to our environment – by keeping it as clean as possible. For this reason, we work worldwide according to the motto, "to make more from less". Eleven production plants of the Hager Group are already certified in accordance with the ISO 14000 international standard and new ones are added to this each year. During product development and production, we rely on Eco-Design and Eco-Production. In the course of this, the entire life cycle of a product (Life Cycle Assessment) is assessed and optimized in terms of ecological considerations. Once the product is finished, we pack it in a way that is not harmful to any tree: in 100% recycled cardboard. This earned Hager the iF Packaging Design Award in 2011. In this way, we continually reduce our ecological footprint – while accelerating technical progress at the same time.

energy

It goes without saying, of course, that we also help our customers to reduce their ecological footprints: with intelligent meters and innovative visualization software we make power consumption visible and enhance energy awareness. Many of our appliances – including dimmers, presence detectors as well as intelligent KNX building automation – actively help to reduce power consumption. And not least of all, the innovative system of Hager also allows regenerative energy sources to be integrated future-proof into each building. In a word: We expend our whole energy – so that you can save yours!

You can find detailed information on E3 at [www.hagergroup.net, sustainability](http://www.hagergroup.net/sustainability).

A design language that everyone understands: Hager Design

For over five decades, Hager has attached the greatest importance to the functionality and reliability of its systems. This is also reflected in the form of our products: Design is not superimposed as beautiful wrapping on the technology, but is developed in harmony with the functions. The external reflects the internal structure. And this external structure is becoming increasingly important nowadays: As electrical installations increasingly take over direct functions both in the office and in the home, the greater is the need to take aesthetic aspects into consideration. In order to meet these requirements – functional and aesthetic – even better, the Hager Group together with the designer Erwin van Handenhoven has established an independent design agency: Hager-Winco.

"Everything you see and touch underlines the idea of simplicity and quality."

Daniel Hager

From the cupboard to the switch

The Hager product range has grown tremendously during the last few decades. Hager has advanced from being a specialist for meter panel systems to a complete electrotechnical supplier for smart homes and intelligent, purpose-built buildings. With cable routing systems and room pillars, exclusive switch ranges and intuitive user interfaces, design requirements have increased as well: Each product has a different function, and each function requires its form design. Thus, Hager speaks a design language with many styles.

From the customer to the designer

To ensure that this design language is understood everywhere, we also give our customers the opportunity to participate: Since time immemorial, Hager has been developing its systems in close collaboration with specialist dealers and selected final consumers. We research national traditions, determine individual desires and pay very close attention when our customers' hearts beat faster. The results are ergonomically shaped solutions that appeal emotionally: through simple installation and operation, through the highest quality and maximum comfort.

We call this process "Voice of Customer".

From the present into the future

In order to meet the growing requirements of our customers even better in future, we established the independent design agency "Hager-Winco" in May 2009. As a result, the long-standing collaboration between Hager and the internationally active product designer Erwin van Handenhoven has now entered a new phase. This has resulted in numerous product highlights that meet the design requirements of tomorrow in particular. You can already find many of these today in the new Hager catalogue.

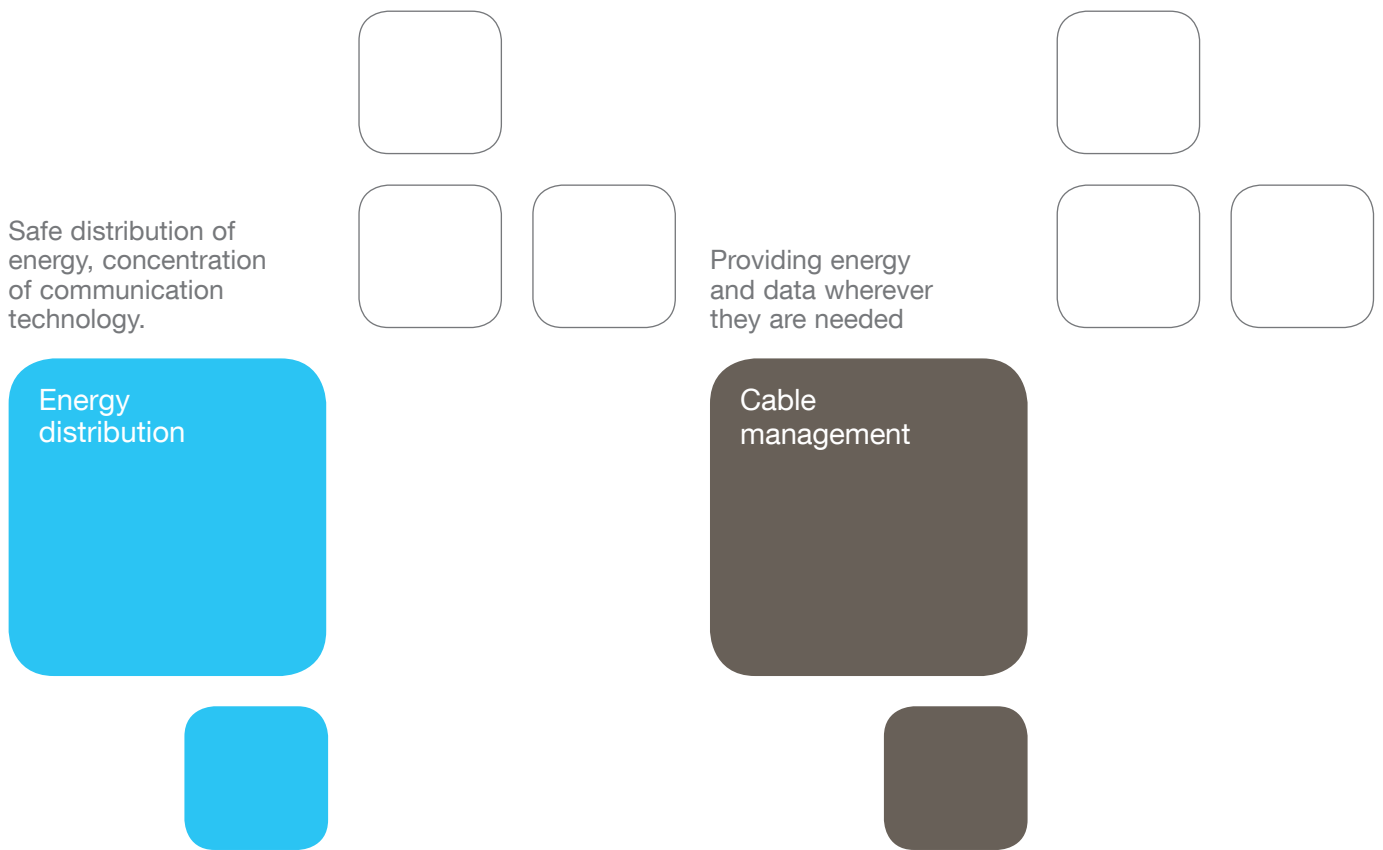

We wish you lots of fun during your discovery!

reddot design award

Erwin van Handenhoven,
Designer for Hager

A clear structure - Hager's range of products

Hager has divided its extensive range of products into three areas of application, each marked with a different colour, to help you finding the right product and solution for your individual needs.

As the leading specialist in the field of electrical installations residential and commercial buildings, the Hager brand provides you with everything from one source: systems and solutions – highest quality, reliable and easy to install.

7000

products

* in Europe (BSRIA study, May 2012)

KNX, the
obvious
choice

Guaranteed compatibility

For over 20 years, the presence of the KNX logo on products has certified that they communicate perfectly with each other, even when they are offered by different manufacturers. This ensures a high degree of flexibility in the extension and modification of facilities.

Seamless continuity

The extent of the KNX community gives the protocol a unique power in the home automation market. Its broad range of products constitutes a set of solutions to meet all situations.

Openness, a state of mind

Various gateways are offered by the adherents of KNX to create links with other specification standards such as DALI and BACNET.

The architecture of a KNX automation installation: flexibility and scalability

The architecture of a KNX building automation installation is based on an original principle, separation of the power and control circuits. This approach provides a distinct advantage: the possibility to change the installation at any time.

Modify and enrich

Unlike traditional systems, a KNX installation does not physically link the control with the function. All the controls are grouped on the bus (wired or wireless).

The goal is to release the potential restricted by command/function association.

Changing the configuration or adding new control points is then achieved simply and without additional work.

The benefits:

- time savings
- scalability of installations without additional work

Integrating linked universes

In a KNX installation, other features such as intrusion and technical alarms, video surveillance, multi-room functions, videophones or even home maintenance systems can be easily integrated via dedicated gateways.

The benefits:

- enrichment of capabilities
- access to other markets
- business development

Berker B.IQ

A wide array of alternative materials and colours have been added to the convenient variety of KNX functionality of the Berker B.IQ.

- Frameless KNX push-button with full-material rockers (glass, stainless steel and aluminium)
 - High scope of functions in the KNX applications through to devices with integrated thermostats
 - The attractive appearance is rounded off using white status LEDs and a blue operation LED
 - Suitable variants for all materials and colours of sockets in the Berker B.7 switch range
- Available materials: plastic and glass in polar white, black and aluminium. Metal variants in aluminium and stainless steel

Push-buttons 18

Light scenes push-buttons 21

Push-buttons with thermostat 22

Labelling fields 24

- For suitable frames in the same "style" for additional applications, see the Design line B.7
- For additional products to complement the installation in matching colours/materials, refer to the Design platform S.1/B.x

Push-buttons

- For switch, push-button, dimmer and shutter functions
- Extension unit for light scene push-button
- For installation in single standard wall boxes
- With dismantling protection

Bus coupling unit flush-mounted

Operating voltage over bus	21 ... 32 V=	- with programming button and red programming LED
Power consumption, KNX	≈ 100 mW	- as interface between KNX user module and bus line
Operating temperature	-5 ... +45 °C	- bus connection via connecting terminal
Insertion depth	23 mm	- without spreader claws

Design	Order no.	PU
Bus coupling unit flush-mounted	7504 00 01	1

B.IQ push-button 1gang comfort

Operating temperature	-5 ... +45 °C	- single and two push-button operation parameterisable
Dimensions (W x H)	88.5 x 88.5 mm	- one push-button operation for switching, pushing, shutters and dimming
		- activation of second user level via object
		- with blue operation LED and 2 white status LEDs (labelling field lighting)
		- alarm telegram after disconnection from bus coupling unit 1 bit or 1 byte
		- cyclic transmission can also be started via switching object
		- value transmitter for dimming, position, brightness and temperature values 1 and 2 byte

Suitable for	Order no.	Page

Push-buttons with thermostat

- For switch, push-button, dimmer, blind and thermostat functions
- Single and two push-button operation parameterisable
- One push-button operation for switching, buttons, blinds and dimming
- Extension unit for light scene push-button
- With 2 white status LEDs per rocker (labelling field illumination)
- With blue operation LED
- For individual single room temperature control
- For heating and/or cooling mode with/without auxiliary step
- Controller operating modes: comfort, standby, night and frost/heat protection mode
- With 2 additional function buttons for display control
- Display of operating mode, controller lockout, room and outside temperature as well as time in connection with a clock
- Temperature measurement via internal temperature sensor and/or external communication object (weighting ratio parameterisable)
- Provision of the internal temperature value via communication object
- With room temperature timer and 2-week timer functions
- Button help function can be activated
- For installation in single standard wall boxes
- For continuous (PI) or switched (2-point) control of max. 2 control circuits
- With dismantling protection
- Text display (ASCII-format)
- LC display with symbols and illumination switchable via object
- With button blocking function
- End customer display scope parameterisable
- Separate object for window contact
- Programmable from ETS2, V1.2a
- Alarm telegram after disconnection from bus coupling unit 1 bit, 1 or 2 byte
- Presence button parameterisable to extend comfort
- Value transmitter for dimming, position, brightness and temperature values 1 and 2 byte

Flush-mounted bus coupling unit for B.IQ with thermostat

Operating voltage over bus	21 ... 32 V=	- for B.IQ push-buttons with thermostat and display or Bluetooth gateways

Berker TS/TS Crystal/ TS Crystal Ball

Behind its elegantly purist exterior, there is an unexpected wealth of technical options: the Berker TS allows operation, not only of multiple light sources, but, if so desired, also of intelligent building control systems. With their fine platform and switching knobs MADE WITH SWAROVSKI ELEMENTS, the Berker TS Crystal lends refinement to any atmosphere.

- Suitable for installation bus systems and relay circuits with safety extra-low voltage
- Material glass
- Crystalline variation of push-buttons MADE WITH SWAROVSKI ELEMENTS for the glass platform of the Berker TS
- Push-buttons available in 4 colours

Supplementary products 30

Cover plates

Glass cover plate

Dimensions (W x H x D) 86 x 160 x 5 mm
Screw length 25 mm

Other components from the B.7 glass range are available, e.g. socket outlets. Observe scale drawings!

- glass with polar white imprint on the backside
- with polar white plastic base
- each with 2 3.5 x 25 mm two-hole screws in chrome, gold and stainless steel for dismantling protection
- with screwdriver
- for vertical and horizontal mounting

Suitable for	Order no.	Page

Berker TS Crystal Ball

Crystal Ball

Operating voltage	8 ... 30 V=	- operation by gently touching the Crystal Ball
Current consumption (operation)	≈ 18.3 mA	- with SWAROWSKI ELEMENTS
Current consumption (idle)	≈ 4.3 mA	- with adapter ring for dismantling protection and shadow gap formation
Switching voltage	max. 30 V	- separate auxiliary power supply needed
Momentary-contact current	10 mA	- with disassembly suction tool
Surface adjustment	20 mm	- NO contact
Dimensions (W x H x D)	86 x 160 x 5 mm	- with screw terminals
		- KNX applications:
		- for parameterisable functions, see universal interface, 2gang, flush-mounted
		- operation with non-choked output of KNX voltage supply possible (pay attention to current consumption)

Suitable for	Order no.	Page
Wall box 2gang	1870	31
Power supply 24 V DC RMD	TGA200	101

Design	Order no.	PU
glass clear, mirrored	1685 78	1

Supplementary products

System interfaces

Universal interface 8gang flush-mounted

Operating voltage over bus	21 ... 32 V=	- for switch, push-button, dimmer and shutter functions
Input scanning voltage	per channel 20 V	- 8 binary inputs, 8 outputs or 4 binary inputs and 4 outputs parameterisable
Output current per channel	max. 0.8 mA	- with 8 independent binary inputs for potential-free contacts
Operating temperature	-5 ... +45 °C	- outputs for LEDs, e.g. as status LED
Line length	10 m	- extension unit for light scene push-button
Line length	max. 10 m	- with programming button and red programming LED
Dimensions (W x H x D)	44 x 48 x 32 mm	- single and two push-button operation parameterisable
		- one push-button operation for switching, pushing and dimming
		- shutter operation concept short-long-short and long-short parameterisable
		- second operating level by object or 3-button handle (only 8-input application)
		- bus connection via connecting terminal
		- object for audio/video control
		- objects: switching, forced guidance, feedback of respective output (only for application 4 inputs/4 outputs)
		- cyclic transmission can also be started via switching object
		- dimming / position value transmitter 1 byte
		- short-circuit and overload proof (electronic fuse)
		- protected against polarity reversal
		- with screw terminals

Berker TS Sensor

Understatement is an art, and the Berker TS Sensor makes it perfect. Up to eight functions are concealed under a pure surface that is practically flush with the wall, and can be custom-labelled on request. A single touch is all it takes to control lights, heating or blinds. In this way, the Berker TS Sensor can offer an exciting variety of possibilities – and, at the same time, still seems as calm as possible.

- Suitable for installation bus systems and relay circuits
- Having the electronics directly on the rear side of the glass plate creates enormous switching safety
- Particularly flat construction method permits flush mounting
- Readiness and switching states can be display using LEDs
- Completely smooth surface thanks to screw-free fastening
- Labelling on rear side meaning perfect protection

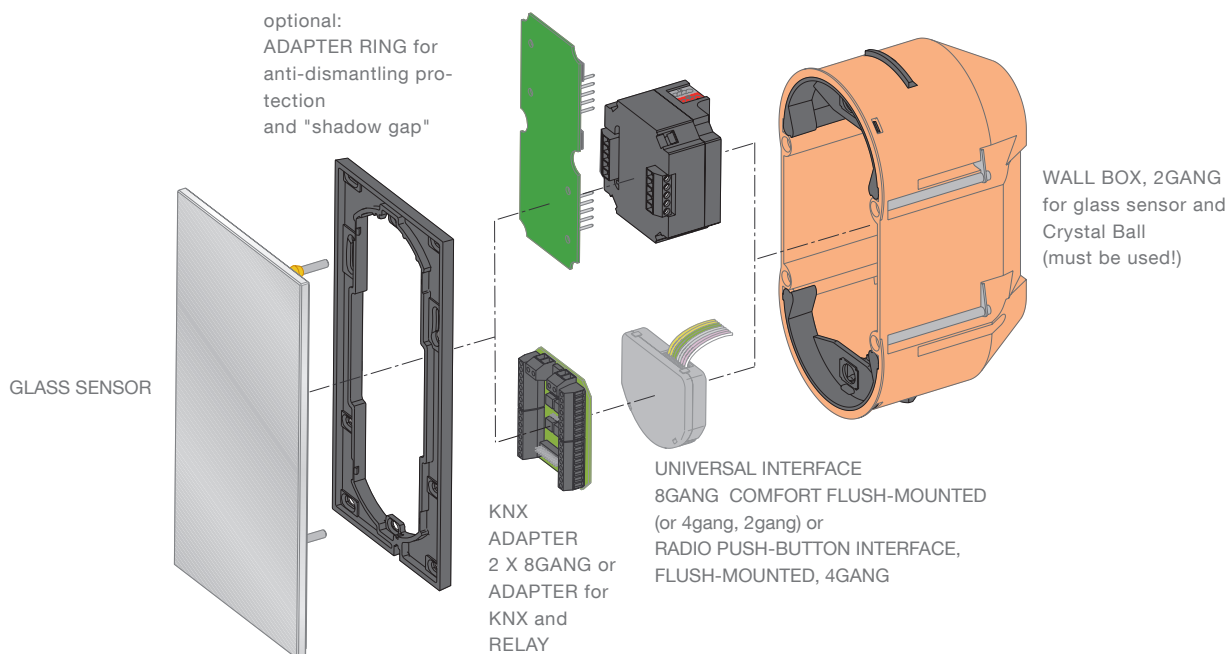

Glass sensors 35

Supplementary products 39

Mounting

Glass sensors are snapped in place on a "wall box, 2gang, for glass sensor and Crystal Ball" using adjustable retaining pins in such a way that the glass sensors are seated almost on the wall. The supplied adapter ring provides anti-dismantling protection and gives the glass plate shadow contours. The adjustable retaining pins can be used to compensate for deviating installation depths or irregularities of the wall of up to 20 mm.

Connection

The glass sensor is connected to the interfaces of the respective systems via an adapter using a ribbon cable (see information for ordering and use). The separate power supply must be connected to the respective adapter.

Connection

The glass sensor with room thermostat is connected directly to the KNX and separate power supply using the connecting terminals located on the backside.

Removal

To pull glass sensors out of the clamp springs of the wall box, use the supplied dismantling aid with suction cups.

Glass sensors

Glass sensors comfort

- With integral bus coupling unit
- Operation by gently touching the sensor surfaces on the white LEDs
- For switch, push-button, dimmer and shutter functions
- Single and two push-button operation parameterisable
- Retrieval, setting and storing of 8 light scenes
- One push-button operation for switching, buttons, blinds and dimming
- Extension unit for light scene push-button
- Integrated temperature sensor
- Temperature measurement via internal and/or external temperature sensor with mean value formation
- Additional connection for external temperature sensor
- Usable as thermostat extension unit
- Provision of the internal temperature value via communication object
- Blocking function for sensor surface e.g. for cleaning the glass surface
- Value transmitter for dimming, position, brightness and temperature values 1 and 2 byte
- Bus connection via connecting terminal
- For vertical mounting
- For mounting, always use the flat 2gang wall box, order no. 1871
- With adapter ring for dismantling protection, shadow jointing and special installation conditions
- With disassembly suction tool
- For individually labelled glass and touch sensors (configured variations), the Web Configurator generates a layout number, which must be additionally specified when placing the order.
- Many options for labelling (text and/or icons) are available via the **web configurator** at <http://ts-glas-sensor.berker.de>

Glass sensor 1gang comfort

- integrated bus coupling unit

Operating voltage 21 ... 32 V=
 Current consumption 12.5 mA
 Operating temperature -5 ... +45 °C
 Dimensions (W x H x D) 86 x 160 x 5.7 mm

Only suitable for KNX.

- with blue operation LED and 2 white status LEDs
- for additional products to complement the installation in matching colours/materials, refer to the Design platform S.1/B.x
- for glass frames in the same "style" for additional applications, see the Design line B.7

Glass sensors with thermostat

- With integral bus coupling unit
- Operation by gently touching the sensor surfaces on the white LEDs
- For switch, push-button, dimmer, blind and thermostat functions
- Single and two push-button operation parameterisable
- Retrieval, setting and storing of 8 light scenes
- One push-button operation for switching, buttons, blinds and dimming
- Extension unit for light scene push-button
- For heating and/or cooling mode with/without auxiliary step
- Controller operating modes: comfort, standby, night and frost/heat protection mode
- LED display with symbol display
- With 2 additional sensor surfaces for display control
- Display of operating mode, controller lockout, room and outside temperature as well as time in connection with a clock
- Integrated temperature sensor
- Temperature measurement via internal and/or external temperature sensor with mean value formation
- Additional connection for external temperature sensor
- Usable as thermostat extension unit
- Temperature control via local measurement or measured value via object
- Blocking function for sensor surface e.g. for cleaning the glass surface
- Value transmitter for dimming, position, brightness and temperature values 1 and 2 byte
- Separate auxiliary power supply needed
- Operation with non-choked output of KNX voltage supply possible (pay attention to current consumption)
- Bus connection via connecting terminal
- For vertical mounting
- For mounting, always use the flat 2gang wall box, order no. 1871
- With adapter ring for dismantling protection and shadow gap formation

Berker R.1/R.3 touch sensors

Just right for the switch programmes in the R.-Design is the Berker Touch Sensor – in a soft (R.1) and cornered (R.3) contour as well as in the glass surfaces black and polar white. The KNX-Touch Sensor has the same assembly height as the switches in the R.-Design. With its integrated bus coupling unit, a variety of building functions can be read and controlled through it.

Touch sensors comfort 42

Touch sensors with thermostat 45

Touch sensors comfort

- With integral bus coupling unit
- Operation by gently touching the sensor surfaces on the white LEDs

Touch sensors with thermostat

- With integral bus coupling unit
- Operation by gently touching the sensor surfaces on the white LEDs
- For switch, push-button, dimmer, blind and thermostat functions
- Single and two push-button operation parameterisable
- One push-button operation for switching, buttons, blinds and dimming
- For individual single room temperature control
- For heating and/or cooling mode with/without auxiliary step
- Operating modes: comfort, standby, night operation and frost/heat protection adjustable
- LED display with symbol display
- With 2 additional sensor surfaces for display control
- Display of operating mode, controller lockout, room and outside temperature as well as time in connection with a clock
- Integrated temperature sensor
- Temperature measurement via internal and/or external temperature sensor with mean value formation
- Additional connection for external temperature sensor
- Provision of the internal temperature value via communication object
- Temperature control via local measurement or measured value via object
- Value transmitter for dimming, position, brightness and temperature values 1 and 2 byte
- Separate auxiliary power supply needed
- Operation with non-choked output of KNX voltage supply possible (pay attention to current consumption)
- Bus connection via connecting terminal
- For mounting on a double box, e.g. order no. 1809 (flush mounting) or 1824 (hollow wall mounting)
- For vertical mounting
- With dismantling protection via a screw on the fastening ring
- For individually labelled glass and touch sensors (configured variations), the Web Configurator generates a layout number, which must be additionally specified when placing the order.
- Many options for labelling (text and/or icons) are available via the **web configurator** at <http://ts-glas-sensor.berker.de>

Touch sensor 2gang with thermostat

- integrated bus coupling unit

Operating voltage	21 ... 32 V=
Current consumption	23 mA
Operating temperature	-5 ... +45 °C
Dimensions (W x H x D)	81 x 152 x 10 mm

Only suitable for KNX.

Berker KNX push-buttons & visualisation

There are devices which want to show everyone, all the time, what they can do. And there are those all-rounders, who hide their technical perfection and spacious insert width behind a discreet surface. These include our KNX control sections, which can be integrated easily into our switch range using simply their design or using a frame.

- single and two push-button operation parameterisable
- one push-button operation for switching, pushing, shutters and dimming
- retrieval, adjustment and storage of 8 light scenes
- usable as thermostat extension unit
- with white operation LED and 8 amber status LEDs
- value transmitter for dimming, position, brightness and temperature values 1 and 2 byte
- cyclic transmission can also be started via switching object

Berker Q.1/Q.3 - push-buttons with thermostat and bus coupling unit

- For switch, push-button, dimmer, blind and thermostat functions
- Single and two push-button operation parameterisable
- One push-button operation for switching, buttons, blinds and dimming
- Extension unit for light scene push-button
- For retrieval, saving and setting of 8 light scenes
- For individual single room temperature control
- For heating and/or cooling mode with/without auxiliary step
- Controller operating modes: comfort, standby, night and frost/heat protection mode
- LC display with symbol display
- With 2 additional function buttons for display control
- Display of operating mode, controller lockout, room and outside temperature as well as time in connection with a clock
- Temperature measurement via internal and/or external temperature sensor with mean value formation
- With room temperature timer
- For installation in single standard wall boxes
- For continuous (PI) or switched (2-point) control of max. 2 control circuits
- With dismantling protection
- With button blocking function
- End customer display scope parameterisable
- Separate object for window contact
- Programmable from ETS2, V1.2a
- Alarm telegram after disconnection from bus coupling unit 1 bit or 1 byte
- Presence button parameterisable to extend comfort
- Value transmitter for dimming, position, brightness and temperature values 1 and 2 byte

Push-button with bus coupling unit

Flush-mounted installation.

Marked items are only suitable for splash-protected IP44 flush-mounted installation when used in conjunction with the corresponding sealing set.

Push-button 1gang

- integrated bus coupling unit

Operating voltage over bus 21 ... 32 V=
Power consumption, KNX ≈ 108 mW
Operating temperature -5 ... +45 °C
Insertion depth 32 mm

– for switch and push-button functions
– with red programming LED and red status LED
– with programming button
– bus connection via connecting terminal

Use rockers from flush-mounted ranges.

Design

Insertion depth	32 mm

Use rockers from flush-mounted ranges.

- for switch, push-button, dimmer and shutter functions
- with neutral-position
- with red programming LED and 2 red status LEDs
- with programming button
- bus connection via connecting terminal

Berker R.1/R.3 - push-buttons

Push-buttons comfort

- For additional products to complement the installation in matching colours/materials, refer to the Design platform R.1/R.3

Push-button module 1gang comfort

- integrated bus coupling unit

Insertion depth	18.4 mm
Operating temperature	-5 ... +45 °C
Operating voltage over bus	21 ... 21 V=

- for switch, push-button, dimmer and shutter functions
- extension unit for light scene push-button
- with white operation LED and 2 RGB status LEDs (amber/green/blue)
- LED colour, brightness and display function adjustable for status LED, e.g. for day/night operation
- single and two push-button operation parameterisable
- one push-button operation for switching, pushing, shutters and dimming
- second operating channel can be set per button for switching or value transmitter
- activation of second user level via object
- value transmitter for dimming, position, brightness and temperature values 1 and 2 byte

Design	Order no.	PU
Push-button module 1gang comfort	7504 10 04	1

Touch cover 1gang for push-button module

- Clear lenses

- with 2 clear lenses for the RGB status display of the push-button module

Push-button module 2gang comfort

- integrated bus coupling unit

Insertion depth	18.4 mm
Operating temperature	-5 ... +45 °C
Operating voltage over bus	32 ... 32 V=

- for switch, push-button, dimmer and shutter functions
- extension unit for light scene push-button
- with white operation LED and 4 RGB status LEDs (amber/green/blue)
- LED colour, brightness and display function adjustable for status LED, e.g. for day/night operation
- single and two push-button operation parameterisable
- one push-button operation for switching, pushing, shutters and dimming
- second operating channel can be set per button for switching or value transmitter
- activation of second user level via object
- value transmitter for dimming, position, brightness and temperature values 1 and 2 byte

Frame

- Labelling field

– also suitable for cable ducts

When the frame has been dismantled, the labelling field remains on the insert.

For inserts with order no. 4522, 4523, 4593, 4594, mounting of the labelling field on the supporting ring is not possible.

For this, the labelling field can be engaged in the recess of the frame.

Frames made from special materials

Frame

Not suitable for water-protected, flush-mounted installation IP44.

Caution!
Installation only possible on a flat surface.
Tighten screws of the covers only by hand.

The colour of surface material can change when exposed to UV radiation.

Caution!
Natural product made from open-pored material, which is sensitive to grease and dirt.

- for vertical and horizontal mounting
- natural, untreated surface structure
- natural material that underscores the individual character by means of developed structures and different material thicknesses and colour schemes

Design	Order No.	PU

Operating panel

Berker Master Control

Operating voltage over bus	21 ... 32 V=	– freely-programmable indication and operating panel with TFT touch display
Auxiliary voltage	230 V~	– 50 dialog pages each with up to 16 parameterisable display elements (max. 400)
Frequency	50/60 Hz	– display elements suitable for invoking predefined or freely-configurable functions
Limit values	max. 32	– calling up dialog pages about KNX object
Logic operations (cascadable)	80	– background bitmaps insertable (e.g. ground plans)
TFT screen size	5,7"	– linking of dialogue pages possible
Resolution graphical display	320 x 240 / 240 x 320 Mpx	– functions e.g. switching, dimming, blinds, light scenes, heating, operating modes, date, time
Graphics memory	≈ 4 MB	– functions e.g. access control, positive operation, value transmitter, value display with/without limit values
Operating temperature	-5 ... +45 °C	– intelligent functions e.g. time links, logic functions, multiplexes parameterisable
Dimensions (W x H x D)	221 x 141 x 46 mm	– display lighting, duration and type of activation and brightness adjustable in 2 stages
		– indication of up to 8 RSS news feeds
		– data logger for recording, evaluation and representation of measuring points as diagram
		– freely-selectable national language (code page) per indication page
		– 50 error messages, can be parameterised
		– indication of the last 20 error messages via message window, audible warning
		– text display (ASCII-format)
		– retrieval of e-mails
		– transmission of predefined e-mails
		– with synchronisable integral real-time clock with date
		– time switch (weekly) with 16 channels each with 8 switching times
		– presence simulation with recording and reproduction type daily sequences
		– astro programme for functions during sunrise/sunset
		– retrieval, adjustment and storage of 24 light scenes with up to 32 outputs
		– integrated alarm system for monitoring of windows, doors and interiors
		– 4 password levels for differentiated access authorization parametrizable
		– integral piezo buzzer
		– remote operation via PC possible
		– programmable via USB interface or network
		– RJ45 Port for LAN connection
		– bus connection via connecting terminal
		– with screw terminals

Design	Order no.	PU
polar white	7574 00 12	1
anthracite	7574 00 13	1

Frame for Master Control

Dimensions (W x H x D) 234 x 168 x 9 mm

Glass, high-gloss, printed on the rear.
Stainless steel, brushed.

Design	Order no.	PU
Stainless steel, metal matt finish	7594 01 03	1
glass polar white	7594 01 01	1
glass black	7594 01 05	1
glass aluminium	7594 01 04	1

Flush-mounted/built-in housing for mini control panels

Cavity wall opening (W x H x D)	212 x 124 x 75 mm	- with cleaning cover
Dimensions (W x H x D)	216 x 134 x 75 mm	- for flush mounting and hollow-wall mounting
Weight	≈ 900 g	

Design	Order no.	PU
grey	7590 00 21	1

IP Control RMD

Operating voltage	10 ... 30 V=	- integrated element library with standard operating elements
Power consumption	5 VA	- freely configurable graphic operating surface for representation on the PC monitor
receivable addresses	32766	- up to 20 operating configurations for different applications
RAM	256 MB	- integration of external control units with JAVA support (e.g. tablet PC) via WLAN
Operating temperature	+0 ... +35 °C	- central operating and visualisation unit for KNX via web browser
Assembling height as from DIN rail	58 mm	- control of multimedia applications
Width of rail mounted device (RMD)	8 TE	- for control and visualisation of e.g. shutters, lights, heating, ventilation, alarm system, sensors
Dimensions (W x H x D)	144 x 90 x 64 mm	- with status LED for operational stand-by, data processing, KNX communication, LAN status

NEW: PRODUCT VARIANT FOR USE-INDEPENDENT ROOM CONTROL:

IP control (order no. 7571 00 36) including software, with which an assignment plan can be stored, for building services engineering control according to room/building use, e.g. in schools according to timetables or in public buildings according to visiting or working times.

Knowledge of the relevant network technology is required for installation.

Mobile devices such as iPhones/iPad, mobile phones or PDAs can be linked via the Internet.

- control of multimedia applications
- for control and visualisation of e.g. shutters, lights, heating, ventilation, alarm system, sensors
- with status LED for operational stand-by, data processing, KNX communication, LAN status
- KNX server to supply up to 15 visualisation clients with KNX data
- time updating via Internet NTP server and sending on the KNX
- creation of light scenes with up to 28 telegrams each
- central functions/scenarios for heating, shutters, illumination, etc. can be configured by end user
- remote commissioning / maintenance of KNX systems possible via the Internet
- commissioning and programming without ETS via web browser
- with week and year timer function
- configuration tool for installation of IP settings and parameterisations
- support of common web browsers (IE, Netscape, Firefox etc.)
- with event indicator for e.g. status/alarm messages via e-mail
- operation with non-choked output of KNX voltage supply possible (pay attention to current consumption)
- administration of 50 users for the control of access authorisation
- database connection to the memory of utilisation/consumption data of the KNX
- also usable with Apple Macintosh
- with updatable Flash-Controller for subsequent function expansions
- integration of network cameras possible
- for LAN connection of individual KNX installations
- with integrated controller for logic functions (concatenations, threshold value processing)
- RJ45 Port for LAN connection
- bus connection via connecting terminal
- with screw terminals

Design	Order no.	PU
IP control RMD, light grey	7571 00 04	1
IP-Control for use-dependent room controllers RMD, light grey	7571 00 36	1

domovea

domovea server incl. software

Operating voltage over bus	21 ... 32 V=
Auxiliary voltage	24 V=
Current consumption (operation)	≈ 150 mA
Power consumption (operation)	≈ 1.5 W
RAM	128 MB
Graphics memory	≈ 20 MB
Processor	400 MHz
Operating temperature	+0 ... +45 °C
Width of rail mounted device (RMD)	6 TE

Central operating and visualisation unit for KNX installations via client software.

Knowledge of the relevant network technology is required for installation.

System requirements: Windows XP, VISTA and Windows 7 (32 or 64-bit).

- user interface can be configured individually for each room with special background images
- creation of max. 50 sequences from different actions
- for control and visualisation of e.g. shutters, lights, heating, ventilation, alarm system, sensors
- with status LEDs for LAN status, operational stand-by and connection status to web portal
- KNX server to supply up to 30 visualisation clients simultaneously with KNX data
- creation of light scenes
- creation of measured value archives and energy consumption visualisation with KNX energy meters
- configuration tool for installation of IP settings and parameterisations
- with configuration and client software on USB stick
- managing up to 30 users with different access rights
- software update via USB interface on the device
- integration of max. 10 network cameras
- RJ45 Port for LAN connection
- bus connection via connecting terminal
- with plug-in terminals

Suitable for	Order no.	Page
Power supply 24 V DC 1A	TGA200	101
optional

 - Power supply 24 V DC 1A, order no. TGA200

Design	Order no.	PU
domovea set	TJA451	1

KNX sensors and actuators

With KNX, a house provides a significant contribution to looking after itself: motion detectors activate lighting as necessary. Windows and doors left open by accident are signalled using magnetic contacts and can be closed automatically. In addition, when the windows are open, the heating system reduces output. Using the Berker KNX bus system, your house can learn to adapt to changed environmental conditions. Actuators are selected according to the resources they are to switch or control. This allows e.g. switchable lamps, socket outlets or fixed-location consumers to be operated with switch actuators. The Berker KNX System so contains a special actuator type for each application.

Motion detectors	104
Thermostats	115
Light sensitive switches	117
Physical sensors	118
Input modules	121
Input / output modules	122
Binary inputs	123
Time switches	125

Analogue actuators	138
Actuators flush mounted / surface-mounted	139

Motion detectors

Bus coupling unit flush-mounted

Operating voltage over bus	21 ... 32 V=	- as interface between KNX user module and bus line
Power consumption, KNX	≈ 100 mW	- with programming button and red programming LED
Operating temperature	-5 ... +45 °C	- bus connection via connecting terminal
Insertion depth	23 mm	- without spreader claws

Design	Order no.	PU
Bus coupling unit flush-mounted	7504 00 01	1

Controller sensors

- With cover to limit detection angle
- Also suitable as extension unit
- Cyclic transmission possible

KNX controller comfort 1.1 m

Power consumption, KNX	≈ 110 mW	- with slide switch for OFF/automatic/ON
Nominal mounting height	1.1 m	- with potentiometers for fine adjustment of the response brightness, sensitivity and delay time
Number of detection levels	2	- with red diagnostic LED for brightness-independent walk test function and disassembly message
Number of switching segments	72	- with lighting and message mode
Detection field, semi-oval shaped	≈ 10 x 12 m	- operating mode switched with object
Detection angle	180 °	- functions for lighting operating mode: Switching, Value transmitter and Light scene call
Range, frontal	≈ 10 m	- parameter defineable lock function
Range, side	each ≈ 6 m	- alarm telegram after disconnection from bus coupling unit, 1-bit
Delay time	≈ 10 s	
Additional delay time programmable	130 ms ... 306 h	
Potentiometer for additional delay time	± 50 %	
Response sensitivity, settable	≈ 20 ... 100 %	
Response brightness, configurable	3 ... 100 / daytime operation lx	
Response brightness adjustable by potentiometer	± 50 %	
Lockout time	8 ms ... 140 min	
Operating temperature	-5 ... +45 °C	
Dimensions assembling height	23.5 mm	

Suitable for	Order no.	Page
Bus coupling unit flush-mounted	7504 00 01	104

Caution:
Direct sunlight can lead to false alarms when using alarm application. Avoid using detection field equipment on windows.

Continuous direct sunlight penetrating the upward-pointing detection level can result in failure of the controller. Only suitable for indoor areas!

When movement of a person is detected a parameter defined data telegram is sent.

KNX motion detector module comfort 1.1 - integrated bus coupling unit

Operating voltage over bus	21 ... 29 V=	- Push-button function: switching functions, dimming functions, blind control functions, value transmitter functions, forced control functions, scene functions
Nominal mounting height	1.1 m	- Specification of the controller operating mode
Delay time adjustable	1 ... 30 min	- Operating mode display via status LED, red/green/orange
Response brightness, adjustable	≈ 5 to 1000 lux	- Operating modes: automatic, permanent ON, ON for 2 hours, permanent OFF
Detection field, rectangular shaped	≈ 10 x 10 m	- Two separated function channels for brightness-dependent and brightness-independent functions
Operating temperature	-5°C ... +45°C	- Integrated button for manual control of bus functions can be configured

Continuous direct sunlight penetrating the upward-pointing detection plane can result in failure of the motion detector. Only suitable for indoor areas !

Automatic triggering of bus functions for movement within the detection area or manual control via integrated button.

Presence detectors

KNX 2 channels presence detector

Supply voltage	Bus 30 V
Power consumption	12 mA
Lighting time delay via potentiometer	1 to 30 min
Presence time delay via potentiometer	30 s to 60 min
Brightness threshold	5 to 1200 lux
Recommended installation distance from ground	2.5 m to 3.5 m
Operating temperature	0°C to 45°C

- TX510 devices are 2-channel presence detectors capable of detecting low amplitude movements (e.g. person working in an office).
- 2 control channels via KNX bus.
- Time delay adjustment for brightness and presence controls via product potentiometers or via ETS.
- Brightness threshold adjustment via product potentiometer or via ETS.
- Detection is by means of 2 pyroelectric sensors located under detection lenses.
- Brightness sensor measures room brightness on a continuous basis, matching it against the brightness threshold set by potentiometer.
- The head of the detector is directional at 90° and can be used to adjust the detection area according to the room configuration.
- Application software allows configuring the 2 channel presence detector 360° TX510.
- The TX510 2-channel presence detector is sensitive to infrared rays associated with heat emitted by moving bodies. Lighting, roller shutter / blind, heating, priority and scene commands can be sent during movement detection, depending on the ambient brightness.
- The lighting channel controls a load in case of presence detection, when the ambient brightness is below an adjustable threshold.
- The presence channel controls a load in case of presence detection, without taking account of the ambient brightness.
- The ambient brightness threshold can be defined by parameterizing or on the device via a potentiometer.
- Lighting and presence delay function sends a command at the end of a delay when no presence has been detected during the delay („absence“ of persons). The delay value can be set by parameterizing or on the device via a potentiometer.
- Brightness probe locking (Lighting channel) function inhibits the brightness measurement of certain detectors when they control the same output.
- This function authorizes or forbids presence detection by the lighting channel (by a clock, for example, at certain periods). The presence channel continues operating independently.
- The operating mode (Automatic or Semi-automatic) is selected by parameterizing or via a switch directly on the device.
- Master/Slave function extends the motion detector's detection area by associating it with several other detectors.
- The Scene Execution function sends group commands to different kinds of outputs to create ambiances or scenarios (presence scenario, absence scenario ...)

KNX presence detector with light regulation

Supply voltage	29 V DC
Power consumption	12 mA
Lighting output operation time	1 to 30 min
Brightness threshold	5 to 1200 lux
Minimum adjustment range	0% to 50%
Presence level adjustment	mini to 100%
Recommended installation distance from ground	2.5 m to 3.5 m
Operating temperature	0°C to 45°C

- TX511 devices, in association with KNX dimmers, offer lighting control functions.
- 1 regulation channel via KNX bus.
- Brightness threshold, lighting time delay and minimum dimming level adjustment via product potentiometer or via ETS.
- They are designed to detect low amplitude movements (e.g. person working in an office).
- Detection is by means of 2 pyroelectric sensors located under detection lenses.
- A brightness sensor measures room brightness on a continuous basis, matching it against the brightness threshold set by potentiometer.
- The head of the detector is directional at 90° and can be used to adjust the detection area according to the room configuration.
- Application software allows configuring the 1-channel 360° presence detector light regulator TX511.
- The TX511 1-channel presence detector with light regulation is sensitive to infrared rays associated with heat emitted by moving bodies. It thus detects the presence or absence of persons in a room.
- Lighting level regulation can be active or inactive.
- When regulation is active, the regulation set points can be defined in Lux either via the potentiometer on the device or by ETS.
- When regulation is inactive, the dimming levels can be defined in % either via the potentiometer on the device or by ETS.
- Set point modification via pushbutton function modifies the regulation set point or the dimming level in the presence of persons via a communicating push button. The new value is then stored.
- Lighting delay function starts a delay at each presence detection; it extends the presence period accordingly.
- Priority function allows overriding a regulation set point (active regulation) or a dimming level (inactive regulation).
- Authorization ON or OFF function authorizes or inhibits presence detection (by a clock, for example, at certain periods).
- The operating mode (Automatic or Semi-automatic) is selected by parameterizing or via a switch directly on the device.
- The Scene function allows defining, for a given scene number, regulation setpoints or lighting levels to create ambiances or scenarios (presence scenario, absence scenario ...)

KNX presence detector 360° monobloc

Supply voltage	KNX bus 30 V DC
Busline consumption	12 mA
Lighting output operating time	1 min to 1 hr
Brightness level	5 to 1000 lux
Recommended installation distance from ground	2.5 m to 3.5 m
Detection range	Ø 7 m (installed product height: 2.5 m)
Hole size required	60 mm (flush mounted)
Operating temperature	0°C to 45°C

- Occupancy sensors TCC520E are presence detectors designed to detect low amplitude movements (e.g. person sitting at a desk).
- Detection is by means of a pyro-electric sensor located under detection lens.
- The occupancy sensor measures the brightness in the room on a continuous basis and compares it to the level preset on the potentiometer or ETS parameter.
- One direct lighting control channel (relay output of the product).
- One lighting control channel on the KNX bus.
- Control of presence/ absence mode.
- Time and brightness adjustment via ETS or remot control EE807.
- Area linking: the occupancy sensor in a room can switch the light on in the corridor beside or the opposite.
- In addition to the local load, the detector can also activate an actuator connected to the bus when presence is detected and brightness level is below a defined threshold.
- The brightness threshold can be defined by ETS or directly on the device via a potentiometer or by means of the installer remote control EE807.
- The lighting time delay defines the activation duration of the lighting channel in case of occupancy. This delay may be reduced when there is enough ambient light. It can be set locally via potentiometer, remote control ETS, EE807.
- The Lighting channel and local load can also be switched on via the remote control ETS or via a EE808 push button.
- Authorization ON or OFF (Lighting channel) function authorizes or forbids presence detection by the lighting channel (by a clock, for example, at certain periods).
- The operating mode (Automatic or Semi-automatic) is selected by parameterizing or via a switch directly on the device.
- This function extends the presence detector's detection area by associating several other detectors.
- The local load can be controlled by the presence detector or directly via communication objects;

KNX presence detector with regulation DALI/DSI

Supply voltage	KNX bus 30 V DC
Busline consumption	12 mA
Lighting output operating time	1 min to 1 hr
Brightness level	5 to 1000 lux
Recommended installation distance from ground	2.5 m to 3.5 m
Detection range	Ø 7 m (installed product height: 2.5 m)
Hole size required	60 mm (flush mounted)
Operating temperature	-10°C to 45°C

- Presence detector with regulation DALI/DSI
- Occupancy sensors TCC521E are presence detectors designed to detect low amplitude movements (e.g. person sitting at a desk).
- Detection is by means of a pyro-electric sensor located under detection lens.
- The occupancy sensor measures the brightness in the room on a continuous basis and compares it to the level preset on the potentiometer (or by means of the remote control EE807 or ETS parameter).
- One lighting control channel on the KNX bus.
- Control of presence/ absence mode.
- Time and brightness adjustment via ETS or remote control EE807.
- Area linking: the occupancy sensor in a room can switch the light on in the corridor beside or the opposite.
- Application software allows configuring the light regulator -channel of TCC521E.
- The TCC521E presence detector for light regulation embeds a DALI/DSI interface that will be used to control directly DALI/DSI ballasts.
- It can also control KNX dimmers and KNX/DALI gateways (TX216) to fulfill the light regulation functionality.
- The lighting regulation process is activated according the presence and absence.
- When regulation is active, the detector regulates the lighting level in the room according to a set-point value in Lux in the presence of persons and according to another set-point value in the absence of persons.
- When regulation is inactive, the detector sets the dimming level of the dimmer outputs to a configurable set % value in the presence of persons and to another configurable set value in the absence of persons.
- Time delay (Lighting and regulation functions) function starts a delay at each presence detection; it extends the presence period accordingly.
- Authorization ON or OFF (Lighting and regulation functions) function authorizes or inhibits presence detection (by a clock, for example, at certain periods).
- The operating mode (Automatic or Semiautomatic) is selected by parameterizing or via a switch directly on the device.
- The Scene function allows defining, for a given scene number, regulation set-points or lighting levels to create ambiances or scenarios (presence scenario, absence scenario).
- Remote control via infra red control EE808.
- Setup with the installer remote control EE807.
- Linking Master / Slave function extends the motion detector's detection area by associating several other detectors.
- In addition to the lighting regulation channel, the detector can also activate an actuator connected to the bus, when presence and brightness level is below a defined threshold.

KNX presence detector monobloc without relay

Supply voltage	KNX bus 30 V DC	- High performance detector to be used in premises or in passage areas, where they increase comfort and reduce drastically energy costs.
Busline consumption	10 mA	
Lighting output operating time	1 min to 1 hr	- KNX commissioning via ETS or TX100
Brightness level	5 to 1000 lux	
Recommended installation distance from ground	2.5 m to 3.5 m	
Detection range	Ø 7 m (installed product height: 2.5 m)	
Hole size required	60 to 63 mm (flush mounted)	
Operating temperature	-10°C to 45°C	

Design	Order no.	PU
white	TCC510S	1

KNX presence detector monobloc multi-channel

Supply voltage	KNX bus 30 V DC	- High performance detector to be used in premises or in passage areas, where they increase comfort and reduce drastically energy costs.
Busline consumption	315 mA	
Lighting output operating time	1 min to 1 hr	- KNX commissioning via ETS.
Brightness level	5 to 1000 lux	
Recommended installation distance from ground	2.5 m to 3.5 m	
Detection range	Ø 7 m (installed product height: 2.5 m)	
Hole size required	60 to 63 mm (flush mounted)	
Operating temperature	-10°C to 45°C

IR configuration hand-held transmitter for presence detector

Dimensions (L x W x H) 111 x 63 x 10 mm
Battery service life [years] ≈ 3.5

Required battery (CR 2032) is included in the scope of delivery.

For convenient configuration of supported presence detectors.

- RC6 code
- additional acknowledgement LED for displaying the IR transmission
- 15 buttons with integrated status-LED
- 3 configuration ranges for control, switch-off delay, brightness threshold
- setting of the brightness threshold manually, by default values or teach-in mode
- default settings can be selected for the brightness threshold daylight, office, corridor
- 2 configuration memories for identical configuration of several presence detectors

Thermostat

- For individual single room temperature control
- For heating and/or cooling mode
- Heating or cooling possible in 2 stages
- Bus connection via connecting terminal
- For continuous (PI) or switched (2-point) control
- With dismantling protection
- 4 binary inputs or 2-3 binary inputs and 1-2 outputs parameterisable
- With 4 independent binary inputs for potential-free contacts e.g. window magnetic contact
- Behaviour can be defined for bus voltage return
- Binary inputs / outputs with screw terminals
- Valve protection can be defined

KNX thermostat

- Setting knob
- integrated bus coupling unit

Output current per channel max. 0.8 mA
 Set value control by setting knob ± 0 ... 5 K
 Operating temperature -5 ... +45 °C
 Cable length, inputs/outputs max. 5 m
 Sensor cable length 50 m

- operating modes: comfort, standby, night lowering, frost/heat protection, dewpoint displayed with LED
- with presence button for switching between comfort and standby mode
- with programming button and red programming LED
- presence button and setting knob can be programmed to have no functions
- with status LEDs: red for heating, blue for cooling and yellow for activation
- without spreader claws

Light sensitive switch

Light sensitive switch

Supply voltage	Bus 29 V
Maximum connection distance of probe	100 m
Operating range	2 to 200 lux 200 to 20000 lux
Operating temperature	0°C to 45°C
Size	2 modules

This product is mainly intended for automatic control of inside/outside lighting circuits (ON/OFF and dimming controls) and blinds or rolling shutters according to ambient lighting level.

Associated with an external probe, this lightsensitive switch measures natural lighting and controls circuits according to a preset threshold range of 2 to 20000 lux.

Several light sensitive switches may be chained to increase the number of channels. In this case, only one probe is connected to one of the light sensitive switches.

Physical sensors

KNX weather station

KNX weather station

Supply voltage	12-40 V DC 12-28 V AC
Consumption	max. 81 mA 24 V DC 10 % residual ripple
IP	44
Operating temperature	-30 °C to 50°C
Dimensions	96 x 77 x 118 mm

The weather station GPS-KNX TG053A measures the outdoor temperature, the wind speed and light. It detects rain and daylight fall.

The weather station gets date/time and site location data from GPS signals. It calculates also the exact position of the sun (Azimuth and Altitude) based on site coordinates and date/time data. This information (brightness level and sun position) is used to control blinds with slats based on sun tracking for up to 6 building frontages.

TG053A compact case houses all sensors, electronic data processing gear, GPS antenna and KNX bus connection.

The values measured are sent to the KNX bus as physical values (2x8 bits or 1 bit). Each output has communication objects indicating the measured and calculated values. The state of outputs depends on one or more levels. Thresholds can be defined by settings or the communication objects.

The weather station TG 053A includes an annual clock and a weekly clock. The clock channels can switch the outputs using the communication objects. The weekly clock controls up to four different time settings for each day of the week. The annual clock can be used to define up to three periods in the year with two daily ON/OFF commands for each of them. The switching times can be defined by settings or the communication objects.

The weather station also has 8 logical AND gates and 8 logical OR gates, each with four inputs. All control events, time programs, and the 8 logical inputs (such as communication objects) can be used as inputs of logical gates. The output of each gate can be configured in 1-bit or 2 x 8-bit format.

ETS software performs KNX configuration.

Wind gauge

Wind gauge

Supply voltage	230 V AC 50 Hz	- Adjustment of wind's speed limit : up to 55 km/h (range ex-works 25 km/h)
contact loading capacity	230 V AC 4 A	- Reaction time when exceeding this limit : 3 seconds (5 seconds max.)
IP	65	- Close time at wind : 10 minutes (fixed)
Operating temperature	-25 °C to 50°C	
Dimensions of the enclosure	80 x 100 x 52 mm	

In the system Tebis, the wind gauge TG050 is used as a protection device for solar shading equipment against strong wind. The speed of the wind is measured by the wind gauge.

If the wind's speed exceeds the value adjusted on the potentiometer for longer than three seconds, the solar shading equipment is retracted and kept in security position for 10 minutes.

After this delay, if the wind speed has decreased, the solar shading equipment can again be controlled by switches.

Design	Order no.	PU
wind gauge and connection enclosure IP65	TG050	1

Supplementary products

Safety transformer 25VA 230V / 12-24V

Operating voltage	230 V~
Frequency	50/60 Hz
Rated power	25VA
Operating temperature	-20 ... +35 °C
Width	4 modules

- These transformers are designed to ensure personal safety, their primary winding are electrically separated from their secondary windings and they are intended to feed safety extra low voltage circuits $U \leq 50V$. A thermal overload, in the primary windings, ensures that if a short circuit or an overload occurs in the output it will not damage the device.

Input modules

- Power supply by Bus.
- The modules are installed in a 60 mm dia. Flush mounting box in association with a pushbutton or a switch.
- Application software is used to configure the individual inputs.
- The sensors associated to the inputs (pushbuttons, switches, automatic controls) are used to control lighting, shutters, blinds.
- The Toggle Switch function changes the status of the controlled output whenever it is operated.
- This function is used for switching lighting, blind or heating circuits ON or OFF. The command may come from switches, pushbuttons or automatic controls.
- This function is used to control lighting circuits using one or two buttons
- The ON / OFF function transmits the ON / OFF object (short key-press).
- The Dimming function transmits the Dimming object (long key-press).
- This function controls a shutter or a blind using one or two push buttons.
- The Up / Down function transmits the Up / Down object (long key-press).
- The Stop / Angle function transmits the Stop / Angle object (short key-press).
- The Alarm 1 and Alarm 2 functions allow alarms coming from automatic controls to be periodically emitted (anemometer, rain detector, light sensitive switch, etc.)
- The Heating mode function is used to select a heating or air conditioning set point (Comfort, Eco, Frost protection, Absence). The command may come from switches, pushbuttons or automatic controls.
- The Value function (2 byte) is used for sending: Percentage %, Temperature °C, Luminosity level Lux, Brightness value % and Value 0-65535.
- The Scene function is used to select and storing scenes.
- The Timer function is used to switch ON or OFF a lighting circuit, shutters, heating for an adjustable time.
- The Priority function allows an input to be forced to a defined status.
- The Two Channel mode function allows controlling, with the same pushbutton, two independent circuits having different functions.
- The Jamming function is used to lock an input via an object on the bus.
- With programming button and red programming LED.

Input / output modules

- Power supply by Bus.
- Control of 2 LEDs.
- The modules are associated with push buttons or switches and are installed in a flush-mounted wall box of diameter 60mm and adapted depth.
- Connection length to push button and LEDs shall not exceed 5m.
- Physical addressing is done using push button and LED.
- Application softwares are used to configure the individual inputs of the TXB322 products.
- The products allow controlling lighting, blinds, shutters, heating and scenes.
- The Priority function sends priority-start or priority-stop commands.
- The Scene function sends group controls to different kinds of outputs to create ambiances or scenarios (leaving home scenario, reading ambience, etc.).
- The Jamming function authorizes product locking. Jamming forbids sending commands.
- The 2-channel mode function allows controlling, with the same pushbutton, 2 independent circuits having different functions.
- LED outputs (statusindication) control the lighting of standard LED signal lamps.

2-input / 2-output module LED (status indication)

LED outputs specifications	I = 850 μ A U = 1.8V DC	- The universal input modules interface potential free contacts with KNX.
Supply voltage	30V DC	- Push buttons, switches and conventional automatisms can thus be used to drive standard LED indicators.
Busline max consumption	15 mA	- Outputs can control conventional signaling LEDs.
Dimensions	38 x 35 x 12 mm	- 2 independent channels.
Degree of protection	IP 30

Connection capacity:	
- for the upper terminals	0.75 to 2.5 mm ²
- for the lower terminals	0.2 to 1.5 mm ²
IP	20
Operating temperature	-5 °C to 45°C
Size	6 modules

The consumption indicator informs users of their consumption through 4 metering channels. It is used to monitor and control energy consumption and is built into an automatic global energy management system.

- This product can be used in a single-phase or three-phase installation. In three-phase, consumption is measured phase by phase
- The data is sent on the KNX bus
- In addition to metering, the consumption indicator also has:
 - 1 tariff input T1/T2
 - a temperature input for the connection of a probe
- The system can be constructed with several TE330. This thus makes it possible to measure one or more circuits using toroids
- The consumption indicator is adapted for use with domovea. In this case, the display devices are:
 - meter (consumption)
 - meter (production)
 - energy
 - power
 - sub-counter (consumption)
- It can also be interfaced with the ambiance units or other display systems thanks to objects sent on the KNX bus
- It is used to display the current tariff and the energy consumption according to the current tariff. The tariff can also be distributed to other devices on the bus
- Includes 3 current transformers and straps.

Three phase energymeter, direct reading 100A

Voltage	230 V AC 50/60 Hz
Starting current	40 mA
Base current	10A
Max current	63A

Energymeters are aimed to measure the active energy consumed by an installation.

They permit to have under control the real cost of an installation and to divide the consumption between the different appliances.

- Fully compliant with the european standard EN50470-3.
- Class B.
- Accuracy 1%
- Energy readout : 7 digits.
- Backlighted display
- Indication of instantaneous power consumption
- Total / partial counter (excepted MID references)
- Pulsed output
- unlimited saving of measures.
- LED flashing according to consumption.
- Option : tarif 1 / tarif 2.
- Three phases energymeters are adapted to all kind of networks.
- Display indication in case of bad wiring.

Design	Order no.	PU
light grey	TE360	1

Three phase energymeters, connection via current transformers

Voltage	230/400 V AC 50/60 Hz
Starting current	10 mA
Max current on CT secondary	6A

- Fully compliant with the european standard EN50470-3.
- Class B.
- Accuracy 1%
- Energy readout : 7 digits.
- Backlighted display
- Indication of instantaneous power consumption

Switching actuators

- Common parameter of switching actuator
- Output states are displayed on the product.
- Outputs can be controlled manually from the product
- Each output to be individually configured for Lighting or Heating
- The ON/OFF function is used to switch a lighting circuit ON or OFF
- The Status indication function displays the status of the output contact
- The Timer function is used to switch a lighting circuit ON or OFF for an adjustable time
- The Time delayed switch function combines a toggle function and a cut-off delay
- The Priority function allows overriding an output to a definite status, ON or OFF
- The Jamming function allows locking an output in its current status
- Each output may be integrated into 32 different scenes
- The Timer and Automatic controls function allow the outputs to be controlled by:
 - Timer functions: Timer/toggle change over, Switching delay, Tripping delay, Switching and tripping delay, Timer.
 - Automatic control functions: Authorization, Logical AND or Logical

OR

- Each output may be integrated into 32 different scenes
- Manual override, permanent or Time limited.
- Behavior in the event of bus voltage failure/Return parameterisable
- With programming button and red programming LED
- Bus connection via connecting terminal
- Quick Connection Terminal

Dim actuators

Universal dim actuators

- 1 dimming channels controlled by KNX bus.
- Universal dimmer with automatic load recognition
- Min/Max level local setting.
- Display of channel state on the product.
- Manual mode that allows dimming even when the bus is disconnected.
- Control button for manual mode.
- Per channels 32 light scenes with a related scene speed
- Short-circuit, over heating & overload protection with LED indication
- With programming button and red programming LED in same button.
- Bus connection via connecting terminal.
- Quick Connection Terminal.

1 channel universal dimmer 300W

Supply voltage	30 V DC 230 V AC 50/60 Hz	- 230 V incandescent and halogen lamps 300W - Halogen ELV (12 or 24V) via ferromagnetic transformer suitable for dimming 300VA.
Busline max consumption	2.3 mA	- Halogen ELV (12 or 24V) via electronic transformer suitable for dimming 300W
Consumption without load	3 W	- Dimmable CFL lamp (CFLi) with integrated ballast suitable for dimming 60W
Power dissipation	4 W	- Dimmable LED lamp(LEDi) with integrated ballast suitable for dimming 60W
Width	4 modules	
Operating temperature	-5°C to +45°C	
Connections	0.75 to 2.5 mm ²	

Design	Order no.	PU
light grey	TYA661A	1

1 channel universal dimmer 600W

Supply voltage	30 V DC 230 V AC 50/60 Hz	- 230 V incandescent and halogen lamps 600W - Halogen ELV (12 or 24V) via ferromagnetic transformer suitable for dimming 600VA.
Busline max consumption	2.3 mA	- Halogen ELV (12 or 24V) via electronic transformer suitable for dimming 600W
Consumption without load	3 W	- Dimmable CFL lamp (CFLi) with integrated ballast suitable for dimming 120W
Power dissipation	7.5 W	- Dimmable LED lamp (LEDi) with integrated ballast suitable for dimming 120W
Width	4 modules	
Operating temperature	-5°C to +45°C	
Connections	0.75 to 2.5 mm ²	

Design	Order no.	PU
light grey	TYA661B	1

3 channels universal dimmer 300W

Supply voltage	30 V DC 230 V AC 50/60 Hz	- 1, 2, or 3 dimming channels controlled by KNX bus. - The product can control 1, 2 or 3 independent lighting circuits, the outputs number depends on the switch position.
Busline max consumption	2.3 mA	- 230 V incandescent and halogen lamps 300W, 600W, 900W according to output selector switch per channel.
Consumption without load	5 W	- Halogen ELV (12 or 24V) via ferromagnetic transformer suitable for dimming 300W, 600W, 900W according to output selector switch per channel.
Power dissipation	8.9 W	- Halogen ELV (12 or 24V) via electronic transformer 300W, 600W, 900W according to output selector switch per channel.
Width	6 modules	- Dimmable CFL lamp (CFLi) with integrated ballast suitable for dimming 210W, 120W, 60W according to output selector switch per channel.
Operating temperature	-5°C to +45°C	- Dimmable LED lamp (LEDi) with integrated ballast suitable for dimming 210W, 120W, 60W according to output selector switch per channel.
Connections	0.75 to 2.5 mm ²	

Design	Order no.	PU
light grey	TYA663A	1

1 - 10 V / DALI interfaces

3 channel 1 - 10 V dimmer

Supply voltage	30 V DC 230 V AC 50/60 Hz
Busline max consumption	2.3 mA
Consumption without load	3 W
Power dissipation	9 W
Control current per channel	50 mA max
Switching current	16A
230 V incandescent and halogen lamps	2300 W
Halogen ELV (12 or 24V) via ferromagnetic transformer/ electronic transformer	1500 VA / 1500 W
Electronic Ballast 1-10V	1000 W
Dimmable Electronic Ballast	50 mA max
Light Dimmer	30 max
Width	4 modules
Operating temperature	0°C to +45°C
Connections	1 to 6 mm ² (screw terminal)

- 3 dimming channels controlled by bus KNX
- Control lighting circuits via a 1/10V connection, acting upon remote control dimmers or electronic ballasts
- Min/Max level local setting
- State of channel displayed on product
- Manual control of channels available locally on the product for Wiring, testing and start-up
- After power on, a 20-sec delay is required for the dimmer switch to perform the first control operation
- With potential-free NO contacts
- Basic brightness programmable
- Behavior in the event of bus voltage failure parameterisable
- With programming button and red programming LED
- Bus connection via connecting terminal
- With screw terminals

Design	Order no.	PU
light grey	TX211A	1

KNX DALI-Gateway

KNX supply voltage	21 ... 32 V DC SELV
External supply voltage	110...240 V AC +10%/-15% 50/60 Hz
Busline max consumption	typically 150 mW
Power consumption	max. 6 W
Total power loss	max. 3 W
Operating temperature	-5°C to +45°C
Connections	screw terminal preferably on top
DALI voltage	typically 16 V DC with overvoltage protection
DALI current	typically 128mA max. 200mA temporarily

- Control of a maximum of 64 DALI devices in a max. of 32 groups
- Manual control of the groups independent of the bus (site operation with broadcast control)
- Feedback of DALI error status or short-circuit and supply voltage failure message
- Central switching function
- Incorporation of the groups into up to 16 lightscenes possible
- All channel-oriented functions can be parameterized separately for each group. This feature permits independent and multi-functional control of the DALI devices
- The Staircase timer function can only be parameterized for groups 1 ... 16
- Adjusting the limit values for brightness is possible.
- Dimming response can be parameterized.
- Soft-On or Soft-Off function
- Disable function or, alternatively, forced-control position function can be parameterized for each group, with the disable function, blinking of lighting groups is possible
- Timer functions (ON-delay, OFF-delay, staircase lighting function, also with pre-warning function)
- Response to bus voltage failure and bus voltage return as well as after ETS programming can be adjusted for each group
- Automatic device replacement
- With programming button and red programming LED
- Bus connection via connecting terminal
- With screw terminals preferably on top

Design	Order no.	PU
light grey	TYA670D	1

3-channel LED controller

3-channel LED controller - voltage controlled

Supply voltage	12-24 V DC	- 3 variation channels controlled by the KNX bus
Maximum charge	2.2 A / channel	- 60 scenes called up by the KNX bus
Max power	12V DC 80 W 24V DC 155 W	- 4 different colour sequences including up to 12 colours per sequence.
Control mode	direct voltage	- Short circuit protection
Number of channel	1-3	- Overheating protection
Control signal	KNX	- Electrical surge protection
Consumption on the KNX bus	Max. 12 mA	- Polarity reversal protection
Operating temperature	-5°C to +45°C	
Connections	KNX wire 0.75 to 1.5 mm ² (screw-on terminal block)	
Output signal	PWM / 600Hz	
Max. cable length	10 m	
Protection degree	IP20	

The TYB673A 3-channel LED controller can be used to vary the luminosity of a voltage controlled LED module. This product can be used more particularly to control a coloured lighting system, create lighting effects or launch a sequence of pre-programmed colours.

Design	Order no.	PU
black	TYB673A	1

3-channel LED controller - current controlled

Supply voltage	24 V DC	- 3 variation channels controlled by the KNX bus
Output current	350/500/700 mA	- 60 scenes called up by the KNX bus
Control mode	direct current	- 4 different colour sequences including up to 12 colours per sequence.
Max output voltage	22V DC	- Short circuit protection
Number of channel	1-3	- Overheating protection
Control signal	KNX	- Electrical surge protection
Consumption on the KNX bus	Max. 12 mA	- Polarity reversal protection
Operating temperature	-5°C to +45°C	
Connections	KNX wire 0.75 to 1.5 mm ² (screw-on terminal block)	
Output signal	PWM / 600Hz	
Max. cable length	10 m	
Protection degree	IP20	

The TYB673B 3-channel LED controller can be used to vary the luminosity of a current controlled LED module. This product can be used more particularly to control a coloured lighting system, create lighting effects or launch a sequence of pre-programmed colours.

Design	Order no.	PU
black	TYB673B	1

Blind actuators RMD

- Outputs can be controlled manually from the product
- Output states are displayed on the product
- Delay time between 2 opposite directions 600 ms.
- Application softwares allow each output to be individually configured for Shutter/Blind applications.
- The Up/Down Function allows moving up or down a shutter, a blind with inclinable slats, an awning, a Venetian blind, etc.
- The Up/Down function also allows opening and closing electric curtains.
- The Slat angle/Stop function allows inclining the slats of a blind or stopping its current movement.
- The Slat angle/Stop function allows modifying the occultation or the direction of the light beams coming from outside.
- The Stop function allows stopping the current shutter movement.
- The Position in % function allows putting a shutter or a blind in a desired position expressed in % of closure.
- The Slat angle function allows inclining the slats of a blind into a desired position expressed in degrees (0° to 180°).
- Wind alarm and rain alarm functions allow putting a shutter or a blind in a parameterisable predefined status.
- The Priority function allows forcing a shutter or a blind into a predefined position.
- The Jamming function allows locking a shutter or a blind in its current position.
- Each output may be integrated into 32 different scenes.
- The Status indication function allows sending on the bus:
 - Status indication (1 byte): indicates the current operating mode of the output (Alarm, Priority, Jamming, and Normal)
 - Position indication in %: indicates the position of the shutter or blind
 - Slat angle indication in °: indicates the position of the shutter or blind
 - Status indication (1Bit): indicates the last movement, up or down, of the shutter or blind

Output device for 4 shutters 230V AC

Supply voltage	30 V DC SELV	- 4 independent channels controlled by bus KNX.
Power dissipation	2W	- Output states are displayed on the product.
Typical consumption on the KNX bus	5,2 mA	- Outputs can be controlled manually from the product.
Standby consumption on the KNX bus	4,5 mA	Each product feature depends on its configuration and settings.
Width	4 modules	
Operating temperature	-5°C to +45°C	
Connections	0.75 to 2.5 mm ²	
Breaking capacity	μ230 Vv 6A AC1	
Surge voltage	4kV	
Protection degree	IP20	

The 4-output drivers TYA624A and TYA624C are actuators that allow interfacing Bus KNX with opening devices. They are part of the tebis Installation System and are designed to control such devices as rolling shutters, blinds with awnings, blinds with slats, etc.

Design	Order no.	PU
output device for 4 shutters	TYA624A	1
output device for 4 shutters and / or blinds	TYA624C	1

Output device for 4 shutters 24V DC

Supply voltage	30 V DC SELV
Power dissipation	2W
Typical consumption on the KNX bus	5,2 mA
Standby consumption on the KNX bus	4,5 mA
Width	4 modules
Operating temperature	-5°C to +45°C
Connections	0.75 to 2.5 mm ²
Breaking capacity	μ 24V DC 6A DC1
Surge voltage	4kV
Protection degree	IP20

- 4 independent channels controlled by bus KNX.
 - Output states are displayed on the product.
 - Outputs can be controlled manually from the product.
- Each product feature depends on its configuration and settings.

The 4-output drivers TYA624B and TYA624D are actuators that allow interfacing Bus KNX with opening devices. They are part of the tebis Installation System and are designed to control such devices as rolling shutters, blinds with awnings, blinds with slats, etc.

Design	Order no.	PU
output device for 4 shutters	TYA624B	1
output device for 4 shutters and / or blinds	TYA624D	1

Output device for 8 shutters 230V AC

Supply voltage	30 V DC SELV
Power dissipation	2W
Typical consumption on the KNX bus	15.8 mA
Standby consumption on the KNX bus	8.8 mA
Width	6 modules
Operating temperature	-5°C to +45°C
Connections	0.75 to 2.5 mm ²
Breaking capacity	μ230 Vv 6A AC1
Surge voltage	4kV
Protection degree	IP20

- 8 independent channels controlled by bus KNX.
 - Product display of outputs status with or without the presence of bus and/or main supply (230V-).
 - The outputs may be switched with or without the presence of bus and/or main supply (230V-).
- Each product feature depends on its configuration and settings.

The 8-output drivers TYA628A and TYA628C are actuators that allow interfacing Bus KNX with opening devices. They are part of the tebis Installation System and are designed to control such devices as rolling shutters, blinds with awnings, blinds with slats, etc.

Design	Order no.	PU
output device for 8 shutters	TYA628A	1
output device for 8 shutters and / or blinds	TYA628C	1

1-output module for shutters and/or blinds, flush mounting

Supply voltage	30 V DC SELV
Power dissipation	225 mW
Typical consumption on the KNX bus	5.9 mA
Standby consumption on the KNX bus	4.7 mA
Dimensions	53 x 29 mm
Operating temperature	-5°C to +45°C
Connections	0.75 to 2.5 mm ²
Breaking capacity	μ230Vv 4A AC1
Surge voltage	4kV
Protection degree	IP20

- 1 controlled channel.
 - Visualization of the movement in progress (up/down) on the product.
 - Up/down manual control option from pushbuttons.
- Each product feature depends on its configuration and settings.

The 1-output controls TYB621C are actuators that enable interfacing of the KNX Bus with the opening elements. They are part of the tebis installation system. They are used to control opening elements such as shutters, awnings, venetian blinds, etc.

Design	Order no.	PU
flush mounting	TYB621C	1

HVAC actuators RMD

Heating actuator 6gang RMD 230 V

Operating voltage over bus	21 ... 32 V=	- valve drives for thermoelectric valve drives 230 V, closed in de-energized state
Auxiliary voltage	230/240 V~	- for individual single room temperature control
Frequency	50/60 Hz	- for continuous (PI) or switched (2-point) control
Switching current at 250 V~	max. 50 mA	- with programming button and red programming LED
Actuators per channel	max. 4	- bus connection via connecting terminal
Operating temperature	-5 ... +45 °C	- with emergency programme, e.g. for sensor or bus failure
Assembling height as from DIN rail	58 mm	- with screw terminals
Dimensions (W x H x D)	72 x 90 x 65 mm	
Width of rail mounted device (RMD)	4 TE	

Suitable for	Order no.	Page
Valve drive 230 V	7590 00 76	137

Design	Order no.	PU
light grey	TYF646T	1

Fan coil actuator 2gang RMD

Operating voltage over bus	21 ... 32 V=	- for the electric activation of fan convectors
Auxiliary voltage	230 V~	- for converting RTR control variables into valve positions, fan stages
230 V incandescent lamps	2300 W	- activation of 1 or 2 fan channels with 6 or 3 fan stages
230 V halogen lamps	2300 W	- for operating modes heating/cooling or heating and cooling
Conventional transformers	1200 W	- manual activation of blow fans using push-buttons or the operating panel
Electronic transformers	1500 W	- use of free channels to control switching loads
Fluorescent lamps:		- 4 manual operation buttons for controlling fan stages and bus function on/off
- uncompensated	1000 W	- manual operating also possible without bus e.g. on building site
- parallel compensated	1160 W /140 µF	- with programming button and red programming LED
Operating temperature	-5 ... +45 °C	- with 8 red status LEDs and 3 red LEDs as manual actuation indication
Assembling height as from DIN rail	63 mm	- bus connection via connecting terminal
Dimensions (W x H x D)	72 x 90 x 70 mm	- with screw terminals
Width	4 modules	

Comply with the fan convector manufacturer's instructions.
Optimised for commissioning with ETS3 from version D, patch A.

Design	Order no.	PU
light grey	TYF642F	1

Valve drives

KNX valve drive

Power supply	bus KNX 30V DC TBTS	- Automatic regulating apparatus and temperature collection apparatus.
Power consumption	< 10 mA	- Work mode: Comfort, Standby, Night time, Frost.
Run time	< 20 s/mm	- Oriented start up
Set force	> 120N	- Forced service
Maximal stroke	6 min	- Summer operation
Target value display	5 LEDs	
Operating temperature	0°C to +50°C	
Dimensions	82 x 50 x 65 mm	

Design	Order no.	PU
white	TX502	1

IP54

Valve drive 230 V

Operating voltage	230 V~	- valve drives closed in de-energized state
Frequency	0 ... 60 Hz	- thermoelectric mode of operation
Power consumption	1.8 W	- with state indication (opened or closed)
Running time	45 s /mm	- with overheating protection
Stroke	4 mm	- with anti-dismantling protection
Operating temperature	+0 ... +60 °C	- pluggable connection cable
Medium temperature	max. 0 ... 100 °C	- for plug-in cover
Pre-assembled cables	≈ 1 m	
Dimensions (W x H x D)	44 x 60 x 61 mm	

Neutral conductor necessary!

Order valve adapter separately.

Suitable for	Order no.	Page
Valve adapter for valve drive	7590 00 7.	137
Heating actuator 6gang RMD 230 V	TYF646T	136
Heating actuator 230 V flush-mounted	TYB641A	139

IP54

Valve drive 24 V AC/DC

Operating voltage	24 V~/=	- valve drives closed in de-energized state
Frequency	50/60 Hz	- thermoelectric mode of operation
Power consumption	1.8 W	- with state indication (opened or closed)
Running time	45 s /mm	- with overheating protection
Stroke	4 mm	- with anti-dismantling protection
Operating temperature	+0 ... +60 °C	- pluggable connection cable
Medium temperature	max. 0 ... 100 °C	- for plug-in cover
Line length	max. 200 m	
Pre-assembled cables	≈ 1 m	
Dimensions (W x H x D)	44 x 60 x 61 mm	

Order valve adapter separately.

Analogue actuators

Analogue actuator 4gang RMD

Operating voltage over bus	21 ... 32 V=	- with green/red status LED (operation/fault)
Auxiliary voltage	24 V~	- with red programming LED
Frequency	50/60 Hz	- channels can be adjusted independently
Output load voltage	> 1 kΩ	- with programming button
Voltage, outputs	0 ... 1; 0 ... 10 V	- expandable with 4gang analogue actuator module
Output current per channel	max. 20 mA	- bus connection via connecting terminal
Current consumption	max. 170 mA	- initial status via status- and/or switch object evaluable
Outputs current	0 ... 20, 4 ... 20 mA	- with 4 independant analogue outputs
Output load current	< 500 Ω	- cyclic supervision of the outputs
Forced controls (1-bit objects)	per channel 2	- with screw terminals
Operating temperature	-5 ... +45 °C	- with system interface for analogue actuator module
Assembling height as from DIN rail	63 mm	
Dimensions (W x H x D)	72 x 90 x 70 mm	
Width of rail mounted device (RMD)	4 TE	

The analogue actuator receives KNX telegrams and converts them into current and/or voltage signals, e.g. for heating, air conditioning and ventilation systems.

Output signals according to DIN IEC 381

Design	Order no.	Page
light grey	TYF684	1

Analogue actuator module 4gang RMD

Operating voltage over bus	21 ... 32 V=	- with 4 yellow output status LEDs
Auxiliary voltage	24 V~	- with green/red status LED (operation/fault)
Frequency	50/60 Hz	- as extension for analogue actuator 4gang
Output load voltage	> 1 kΩ	- with 4 independant analogue outputs
Voltage, outputs	0 ... 1; 0 ... 10 V	- cyclic supervision of the outputs
Output current per channel	max. 20 mA	- with screw terminals
Current consumption	max. 170 mA	- with system plug for connection to the analogue actuator system interface
Outputs current	0 ... 20, 4 ... 20 mA	
Output load current	< 500 Ω	
Forced controls (1-bit objects)	per channel 2	
Operating temperature	-5 ... +45 °C	
Assembling height as from DIN rail	63 mm	
Dimensions (W x H x D)	72 x 90 x 70 mm	
Width of rail mounted device (RMD)	4 TE	

Output signals according to DIN IEC 381

Design	Order no.	Page
light grey	TYF684A	1

Actuators, flush/surface-mounted

Heating actuator 230 V flush-mounted

Operating voltage	21 ... 32 V=	- binary input functions: Switching, dimming, shutter control and value transmitter
Switching current for electronic outputs	max. 25 mA	- for individual single room temperature control
Actuators per channel	max. 2	- for continuous (PI) or switched (2-point) control
Operating temperature	-5 ... +45 °C	- with programming button and red programming LED
Load cable length	≈ 20 cm with 2 x 1,5 mm ²	- 1 electronic output (triac) for connection of 230V thermoelectric actuator drives
Cable length, bus + inputs (extendable to max. 5 m)	≈ 33 cm	- with 3 independent binary inputs for potential-free contacts
Dimensions (Ø x H)	53 x 28 mm	- with emergency programme, e.g. for sensor or bus failure
Optimised for commissioning with ETS3 from version D, patch A.		- installation in flush-mounted or splash-protected junction box
		- pre-assembled, with cables

Suitable for	Order no.	Page
Valve drive 230 V	7590 00 76	137

Design	Order no.	PU
light grey	TYB641A	1

Heating actuator 6 channels

Supply voltage	230V AC	- for valve drives 24 V, closed in de-energized state
Bus KNX	30V DC TBTS	- with on red heat request LED per channel
Max. power uptake	50W	- with green operation LED and red programming LED
Bus power consumption	< 10mA	- with red fuse LED
Standard fuse	T 2A	- with integral transformer
Max. number of actuators	13	- bus connection via connecting terminal
Operating temperature	-5 to +40 °C	- with emergency programme, e.g. for sensor or bus failure
Dimensions (W x H x D)	302 x 75 x 70 mm	- short-circuit and overload proof (fine-wire fuse)
Frequency	50/60 Hz	- with plug-in terminals
		- for individual single room temperature control
		- for continuous (PI) or switched (2-point) control

Suitable for	Order no.	Page
Valve drive 24 V AC/DC	7590 00 77	137

KNX system units

The system components are KNX devices, which assume higher-level functions, independent of the application. They guarantee the necessary infrastructure in the building, ensuring a flawless information exchange between sensors and actuators. In addition, the system devices stand for the highest quality and functional safety in the system.

Accessories	145

Power supplies

- With integral choke
- Short-circuit and overload protection
- The "OK" indicator lights up in normal working mode
- The "I>I_{max}" indicator lights up, eliminate the origin of the fault (short circuit or overload)
- Protected earth conductor must be connected
- Quick Connection Terminal

Power supply 320 mA RMD

Supply voltage	230V AC 50/60 Hz
Output voltage	30V DC
Output current max.	320 mA
Absorbed power	15 VA
Width	4 modules
Operating temperature	-5 ... +45°C
Connections	Quick Connection 0.75 to 2.5 mm ²

Design	Order no.	PU
light grey	TXA111	1

Power supply 640 mA RMD

Supply voltage	230V AC 50/60 Hz
Output voltage	30V DC
Output current max.	640 mA
Absorbed power	24 VA
Width	4 modules
Operating temperature	-5 ... +45°C
Connections	Quick Connection 0.75 to 2.5 mm ²

Design	Order no.	PU
light grey	TXA112	1

Power supply 160 mA RMD

Supply voltage	230V AC 50/60 Hz
Output voltage	30V DC
Output current max.	160 mA
Absorbed power	15 VA
Width	4 modules
Operating temperature	-5 ... +45°C
Connections	Quick Connection 0.75 to 2.5 mm ²

Design	Order no.	PU
light grey	TXA113	1

Power supply 1x30V, 320 mA + 1x24V, 640 mA RMD

Supply voltage	230V AC 50/60 Hz
Output voltage	30V DC and 24 V DC
Output current max.	320 mA and 640 mA
Absorbed power	4.4 W
Width	4 modules
Operating temperature	-5 ... +45°C
Connections	Quick Connection 0.75 to 2.5 mm ²

Design	Order no.	PU
light grey	TXA114	1

Power supply 2x30V, 320 mA RMD

Supply voltage	230V AC 50/60 Hz	- Power supply has 2 outputs KNX 30 V DC 320 mA
Output voltage	30V DC	
Output current max.	2 x 30 V DC 320 mA	
Absorbed power	3.5 W	
Width	4 modules	
Operating temperature	-5 ... +45°C	
Connections	Quick Connection 0.75 to 2.5 mm ²	

Design	Order no.	PU
light grey	TXA116	1

Couplers

Line coupler

Operating voltage	21 - 32 V DC	- Can be used as line/area coupler or line amplifier.
Width	2 modules	- With programming button.
Operating temperature	-5 ... +45°C	- With green operation LED, red programming LED and red diagnosis LED.
		- With 2 yellow data traffic LEDs for higher and lower ranking line.
		- Allows extension of a wire line and repeats the messages.
		- Ensures a galvanic insulation between lines.
		- Necessary in case of systems with more than 64 wire products.
		- Line connection via connecting terminal

Design	Order no.	PU
light grey	TYF130	1

Router IP/KNX

Supply voltage	KNX bus (21 -30V DC)	- Quick communication of lines/areas and systems via data networks (Internet protocols).
External SELV power	24V AC/DC (12-30V AC/DC)	- Needed for operation a power supply of 24 V DC.
Supply:	1.6 GHz	- As interface to PCs and data processing devices.
- power usage from the bus line	10mA max 30V DC	- For reporting bus voltage failure via data networks.
- power usage from the auxiliary power supply	800mW max (25mA - 24V DC)	- Internet protocols supported: ARP, ICMP, IGMP, UDP/IP, and DHCP.
Operating temperature	-5°C to 45°C	- IP according to Konnex specifications: Core, Routing, Tunneling, Device Management.
Width	2 modules	- Can be used as line/area coupler.
		- With RJ45 connection for Ethernet/IP networks.
		- With programming button and red programming LED.
		- With green operation LED and yellow data traffic LED.
		- With green, yellow and red LEDs for indicating the IP communication.
		- Line connection via connecting terminal.
		- Operating voltage connection via connecting terminal.

Design	Order no.	PU
Router IP/KNX	TH210	1

Data interfaces

KNX data interface USB flush-mounted

Operating voltage over bus	21 ... 32 V=
Data transmission rate	max. 9.6 kBd
Operating temperature	-5 ... +45 °C
USB cable length	max. 5 m

For connection of a PC for addressing, programming and diagnosis of KNX components and for visualisation.

- programmable from ETS3, V1.0
- for addressing, programming and diagnosis of KNX components
- with B-type USB socket for data traffic (voltage supply via PC)
- compatible with USB 1.1/2.0 transmission protocols
- system requirements: Windows 2000 or later
- without spreader claws
- with flash-controller technology

Accessories

Data rail with connector

Operating temperature	-5 ... +45 °C	- with 4 plug-in terminals 4pole
length	214 mm	- self-adhesive
For DIN rail with depth	7.5 mm	
Width of rail mounted device (RMD)	12 TE	

For DIN rail 35 x 7.5 mm to according to DIN EN 60715

Design	Order no.	PU
Data rail with connector	7500 00 08	1

Cover for data rail

Operating temperature	-5 ... +45 °C	- to protect against dirt contamination and interference voltage
length	240 mm	
divisible into	0.5 TE-steps	
Width of rail mounted device (RMD)	13.5 TE	

Design	Order no.	PU
light grey	7500 00 04	5

Connecting terminal

Operating temperature	-5 ... +45 °C	- 2pole
Conductor Ø	0.6 ... 0.8 mm	- for the bus connection of the units
Number of conductors	2 x 4	- polarization red + black -
Dimensions (L x W x H)	10.2 x 11.5 x 10 mm	- can be used as branch terminal
		- with plug-in terminals

Design	Order no.	PU

KNX surge protection device

Nominal voltage	24 V
Nominal current (max.)	3 A
Nominal discharge current	5 kA
Limiting discharge	8 kA
Protection level at 100 V / S	≤ 350 V
Protection level at 1 kV / S	≤ 500 V
Response time	≤ 100 ms
Insulation resistance	> 10,000 MΩ
Capacity	1 pF
Operating temperature	-25 to +80°C
Bus connection	line Ø 0.8 mm, length 200 m
Ground connection	conductor 0.75 mm ² , length 200 m

- The application is recommended if:
 - The bus line is laid parallel to high-performance power lines,
 - The bus line is routed in parallel to metal installation parts that can flow through the lightning currents,
 - The bus line is used building border.

Design	Order no.	PU
